
PROFESSIONAL BRICK CLEANING
HAS ARRIVED IN NZ!

AKL
BRICK WASH

THE PERFECT FINISH TO A JOB WELL DONE.

Have you ever wondered why the brickwork is so much cleaner in Australia than in NZ? Are the bricklayers in Australia more skilled? Do they take more pride in their work?

The answer is no, we are very lucky to have some of the most skilled bricklayers in the world living in NZ.

The simple reason is there is a very successful brick cleaning industry operating in Australia which is quite separate to the bricklaying industry. The result is very clean brickwork.

No matter how skilled the bricklayer is they don't have the specialist equipment required to clean many of the more challenging bricks available to a high standard.

There is an increased awareness from builders and developers that for a nominal sum having their brick veneers professionally cleaned lifts the presentation of their product and adds value in what is a competitive market.

THE DIFFERENCE IS...

ABOUT US.

AKL Brick Wash is proudly owned by Mike Massey & Chris Wilson. Mike & Chris are LPB qualified Brick & Blocklayers, owners of Auckland Bricklayers Ltd and members of members of Masonry Trades Association of New Zealand.

Mike and Chris specialise in cleaning mortar residue from newly laid brickwork. With hundreds of cleans under their belt on a huge variety of brickwork they are experts and leaders in their field.

EQUIPMENT.

AKL's mobile brick cleaning unit was custom built in NZ specifically to clean brickwork.

Utilizing variable pressure and based on successful designs operating in Germany and Australia for decades.

ACID FREE.

Brickwork has traditionally been cleaned using Hydrochloric Acid. However, AKL Brick Wash chooses to use a synthetic acid which is 100% non-toxic, fully bio degradable, non-fuming with a triple zero HMIS score. Great for everyone on site and great for the environment.

FAST TURNAROUND.

Because variable pressure is used, newly laid brickwork can be cleaned 48 hours after it is finished with no damage to brickwork or joints.

HELPFUL TIPS.

GET THE BEST OUT OF YOUR BRICK WASH.

➔ **Tips for the QS.**

You only need to allocate \$7 per m² to have your newly laid brickwork professionally cleaned. Feel free to phone us for advice

➔ **Tips for the Bricklayer.**

Just lay, don't even attempt to clean! Brush it and keep it free from dags and we will do the rest. Do you have a challenging brick to lay? Get us involved before you start!

➔ **Tips for the Project Manager.**

We don't need it for long, but we do need the scaffold left up if the work is above 2.5m. Give us a few days notice before the bricklayers are due to finish and we can get in and out really fast.

REFERENCES.

**WE HAVE PERFORMED HUNDREDS OF BRICK CLEANING JOBS,
HERE ARE A FEW COMMENTS FROM OUR HAPPY CUSTOMERS.**

“Mike & Chris from AKL Brick Wash cleaned the brickwork on four of our newly finished premium homes. They were fast, highly professional and the outcome was very impressive.”

Phil Watson, Project Manager, Nuline Construction Ltd

“Very impressed with the outcome, the owners were stoked”

Matt Hepper, Project Manager, Fowler Homes Ltd.

“Brilliant! We were on a tight timeline and they got in two days after we finished and made the job look like a million dollars. Was worried about damage with it being so freshly laid but these guys are too good at what they do”

Alun Jones, Jones Brick and Block Ltd

“AKL Brick Wash came in and cleaned the brickwork on 14 of our Terrace Houses, what a difference! A fantastic job!”

Minesh Lal, Project Manager, GJ Gardener Ltd
